Sassetta, the subtle genius from Siena, revolutionized Italian painting with an altarpiece for the small Tuscan town of Borgo San Sepolcro in 1437-1444. To produce this volume, experts in art and general history have joined forces across the boundaries of eight different nations to explore Sassetta's work. Convertitosi al cattolicesimo nel 1922, Chesterton pubblicò questo «bozzetto» su san Francesco nel 1923, come se dalla conversione del Santo di Assisi traesse uno spirituale alimento per la propria. Per Chesterton san Francesco era soprattutto un uomo innamorato di Dio e della Creazione, un poeta che si sentiva piccolo e cantava la gloria delle piccole cose, dei piccoli esseri viventi, della vita***

***ordinaria di coloro che aiutava nella lotta contro la miseria. Dai folli gesti di carità compiuti quando era ancora il figlio di un mercante al rifiuto del mondo e alla creazione di un Ordine e di una regola che davvero imitavano la vita di Cristo, alle stigmate ricevute sul monte della Verna, e fino alla morte, ogni passo del suo cammino su questa terra era rivolto al cielo. Un amore così grande e appassionato, una mistica così semplice e assoluta appaiono «scandalose» alla mentalità moderna. Ma è proprio essa che Chesterton vuole scuotere in queste pagine, cercando di aiutarla, con la consueta ironia, a compiere il movimento di rivoluzione interiore che fece del piccolo Francesco Bernardone il grande san Francesco. What was the real power of the Norman admirals? In what way did they practise their authority? This study on the Norman admiralty in Sicily focuses on the development of this office as it changes from an office to a title with increasing and incredible prestige in the years from the second half of the 11th century to the end of the 12th century. The admiral was an officer who worked in the royal palace for the royal authority as prime minister and was fundamental in orchestrating cultural activities. However, the admirals also established their power in fields separate to those of their position. The position of admiral was a unicum in Medieval Europe since no other political institution had a similar figure and his contribution was crucial for the development of the Norman kingdom in Sicily. The intention of this work is to study the sphere of competences of the admiralty and to give a global and definitive view of the impact of the Norman admirals between the second half of the 11th century and the end of the 12th. This is a reproduction of a book published before 1923. This book may have occasional imperfections such as missing or blurred pages, poor pictures, errant marks, etc. that were either part of the original artifact, or were introduced by the scanning process. Among the founding nations of the European Union, no nation has experienced a more devastating affect from the 2008 economic crisis than Italy.***

***Although its recovery has recently begun, Italy has fallen even further behind EU economic leaders and the EU average. Looking at how and why this happened, Facing the Crisis brings together ethnographic material from anthropological research projects carried out in various Italian industrial locations. With its wide breadth of locations and industries, the volume looks at all corners of the diverse Italian manufacturing system. More than one hundred years after Futurism exploded onto the European stage with its unique brand of art and literature, there is a need to reassess the whole movement, from its Italian roots to its international ramifications. In wide-ranging essays based on fresh research, the contributors to this collection examine both the original context and the cultural legacy of Futurism. Chapters touch on topics such as Futurism and Fascism, the geopolitics of Futurism, the Futurist woman, and translating Futurist texts. A large portion of the book is devoted to the practical aspects of performing Futurist theatrical ideas in the twenty-first century.***

***I greci del periodo classico, tra il VI ed il IV secolo a.C., ci hanno lasciato in eredità un volume enorme di opere letterarie e manufatti artistici che, a loro dire, avrebbero celebrato una epopea vittoriosa di guerre contro un popolo di donne guerriere, le amazzoni. Dopo tanti secoli quasi nessuno ci credeva più, ma le ricerche archeologiche e paleoantropologiche più recenti hanno evidenziato l'incredibile. Nel passato sono realmente esistite, proprio dove gli antichi greci ubicavano le amazzoni, delle popolazioni seminomadi in cui, quando gli uomini, erano impegnati in missioni belliche, pastorali o commerciali, chi difendeva eventualmente, con le armi, il villaggio erano proprio le mamme dei bambini che da quell'insediamento non potevano allontanarsi. Per saperlo fare, queste donne avevano trascorso la loro adolescenza come vere e proprie arcieri a cavallo, intruppate con i fratelli ed i cugini in unità paramilitari, comandate dai loro padri e zii.***

***Probabilmente non sono mai esistite legioni o falangi di donne guerriere ma oggi sappiamo che, fino all'epoca neolitica, le donne di tutto il mondo, hanno sempre vissuto con lancia, arco e frecce a portata di mano, per difendersi, anche ma non solo, da lupi, orsi, tigri e cinghiali. E impossibile che qualunque lavoro storico non abbia molta materia a comune co' precedenti, perche esso si fonda non su mutabili idee, ma su fatti immutabili; e non so davvero come potrebbe scrivere una storia, non un romanzo, chi pretendesse rifarla tutta di sua testa, senza tener conto delle notizie e delle date piu certe. The technical problems confronting different societies in different periods and the measures taken to solve them form the concern of this annual collection of essays. Dealing with the history of technical discovery and change, the volumes in this series explore the relationship of technology to other aspects of life-social, cultural and economic-and show how technological development has shaped, and been shaped by, the society in which it has occurred.
