Civilizing World Politics Apr 11 2022 Civilizing World Politics offers an innovative approach to the changing contexts of global politics, moving beyond the ever more fuzzy debate on globalization to a concept of world society that transcends the nation state and embraces communities including nongovernmental organizations. It brings together research from various fields of political science, sociology, and social theory in new ways, successfully introducing U.S. students of international affairs to contemporary continental research in a way that enlightens as it civilizes.

Social Work and Community Practice May 12 2022 This book explores a variety of physical, mental, and lifestyle challenges faced by community populations. Some of the topics discussed include homelessness, smoking trends among certain populations,

mental health issues among different age and gender groups, substance abuse, and domestic violence. The book also examines community health promotion, nutrition intervention, contraception, and more.

Community Development for Social Change Oct 05 2021 *Community Development for Social Change provides a comprehensive introduction to the theory and practice of community development and associated activities, discusses best practice from global experience and links that to the UK context. The book integrates the realities of practice to key underpinning theories, human rights, values and a commitment to promoting social justice. A range of practice models are described and analysed, including UK models, popular education and community organising, as well as a range of practice issues that need to be understood by community development workers. For example, strategies to promote individual and community empowerment, challenging discrimination, building and sustaining groups, and critical reflection on practice. Finally, a range of case studies from the UK and overseas illustrates good practice in diverse contexts. These case studies are analysed with reference to the values of community development, the promotion of social justice and the underpinning theories. It is an essential text for those on community development courses as well as for a range of workers, including local government, national and local voluntary agencies, and community-based organisations.*

Social and Community Psychiatry Aug 03 2021 *This book presents the basic theoretical and historical concepts and it describes current perspectives and data, focusing on good practices in community psychiatry in Greece and in other parts of Europe. Concepts such as the biopsychosocial model, psychiatric reform, psychosocial rehabilitation and the recovery model, as well as new case management models are approached from a critical, anthropocentric perspective. The current socioeconomic crisis in Europe brings with it new realities in mental health systems. New forms of social suffering are forcing the psychiatric community to re-examine what is considered normal. In order to respond to the complexity of the newly emerging needs, social and community psychiatry has been compelled to broaden the objectives of intervention and research alike, developing new and dynamic relations with complementary scientific fields such as social anthropology, psychoanalysis and microeconomics. The present work is the result of collaboration between professionals*

from across these different fields.

Theories, Practices and Examples for Community and Social Informatics Jan 20 2023
Community Informatics involves study of the relationship between the design of information and communications technologies (ICTs) and local communities. This book uses a combination of theoretical and case study approaches to explore connections between Community Informatics, Social Informatics, and broader social theory.

War, Community, and Social Change Nov 13 2019
Collective experiences in the former Yugoslavia documents and analyses how social representations and practices are shaped by collective violence in a context of ethnic discourse. What are the effects of violence and what are the effects of collectively experienced victimisation on societal norms, attitudes and collective beliefs? This volume stresses that mass violence has a de- and re-structuring role for manifold psychosocial processes. A combined psychosocial approach draws attention to how most people in the former Yugoslavia had to endure and cope with war and dramatic societal changes and how they resisted and overcame ethnic rivalry, violence and segregation. It is a departure from the mindset that depict most people in the former Yugoslavia as either blind followers of ethnic war entrepreneurs or as intrinsically motivated for violence by deep-rooted intra-ethnic loyalties and inter-ethnic animosities.

Community-based Learning and Social Movements Jul 14 2022
The rise of Far-Right populism poses major challenges for communities, exacerbating divisions, hate speech and hate crime. Mayo shows how communities and social justice movements can effectively tackle these issues, working together to mitigate their underlying causes and more immediate manifestations. Showing that community-based learning is integral to the development of strategies to promote more hopeful rather than more hateful futures, Mayo demonstrates how, through popular education and participatory action research, communities can develop their own understandings of their problems. Using case studies that illustrate education approaches in practice, she shows how communities can engineer democratic forms of social change.

Asset Assessments and Community Social Work Practice Mar 18 2020
Needs assessments identify the needs for services, answering questions about who needs these services and in what priority. Asset assessments focuses on existing resources; combing both needs and asset assessments helps find the gaps in these services and is useful to organizations and communities.

Football, Community and Social Inclusion Oct 25 2020
This special issue addresses the complex reality of English community football organisations, including Football in the Community (FitC) schemes, which have been attending to social agendas, such as social inclusion and health promotion. The positioning of football as a key agent of

change for this diverse range of social issues has resulted in an increase in funding support. Despite the increased availability of funding and the (apparent) willingness of football clubs to adopt such an altruistic position within society, there remains limited empirical evidence to substantiate football's ability to deliver results. This book explores the current role of a football and football clubs in supporting and delivering social inclusion and health promotion to its community and seeks to examine the philosophical, political, environmental and practical challenges of this work. The power and subsequent lure of a football club and its brand is an ideal vehicle to entice and capture populations that (normally) ignore or turn away from positive social and/or health behaviours. The foundations of such a belief are examined, outlining key recommendations and considerations for both researchers and practitioners attending to these social and health issues through the vehicle of football. This book was originally published as a special issue of Soccer & Society.

Social Work Practice in Community-based Health Care Feb 26 2021 As a result of escalating costs, the focus of health care in the United States has shifted from inpatient, hospital-based care to outpatient care in the community. Social Work Practice in Community-Based Health Care is a comprehensive guide to the knowledge and skills needed to provide effective and efficient practice within a managed-care context that's focused on a diversified, aging consumer population and high-risk health conditions. This unique book examines the essential elements of community health practice, including logic modeling for planning and evaluation, interdisciplinary collaboration, and the use of technology and telemedicine in social work practice.

Social Factors and Community Well-Being Dec 19 2022 This book explores social factors that influence well-being, as well as the relationship between these factors. It examines individual areas of social policy from the perspective of children's well-being, gender equity, and the impact of crime and social capital. The book discusses the relationships of well-being with the provision of public services, with developing a sense of community, and dimensions of happiness in nations. Bringing together perspectives from around the globe, the book provides both theoretical and applied explorations. It links the idea of influencing social factors and outcomes to community well-being, thus adding a new perspective. In doing so, it reflects the new and exciting research that is being conducted at the intersection between social factors, policy, impacts, and community well-being.

Facilitating Community Research for Social Change Dec 27 2020 Facilitating Community Research for Social Change asks: what does ethical research facilitation look like in projects that seek to move toward social change? How can scholars weave political and social justice through multiple levels of the research process? This edited

collection presents chapters that investigate research facilitation in ways that specifically attempt to disrupt and challenge anti-Indigenous and anti-Black racism, ableism, homophobia, transphobia, patriarchy, and sexism to work toward social change. It also explores what it means to develop facilitation practices across multiple contexts and research settings, including specific facilitation methods considered by researchers working with visual and community-based methods with Black, Indigenous, and racialized communities. The complexities of how scholars negotiate decisions within their research with people and communities have an effect not only on how researchers construct their participants and communities, but also on the overall purpose of projects, the ways their projects are shared and disseminated, and what is learned in the doing of facilitation. This book will be of great interest to both emerging and established researchers working within the social sciences. It specifically attends to diverse fields within the social sciences that include health, media studies, environmental studies, social work, sociology, education, participatory visual research methodologies, as well as the evolving field of digital humanities.

50 Years Of Social Issues In Singapore Jan 08 2022 The social context of Singapore is changing rapidly, and understanding how people think, feel and behave in various situations has become a key driver of effectiveness in addressing social issues. 50 Years of Social Issues in Singapore provides a comprehensive review and examination of

various social issues at multiple levels of analysis including the individual, group and society. This invaluable book adopts a translational approach to social issues in Singapore by explicitly bridging intellectual and practical perspectives. Contributed by a distinguished team of authors, the chapters examine the critical ideas underlying public debates of social issues and their policy and practical implications. The book is organized into three parts. Part I examines issues of population and social fundamentals in Singapore such as ageing, marriage, urban planning, healthcare and racial and religious harmony. Part II analyses Singapore's social progress through issues of inclusivity such as social mobility, developing communities and marginal groups that deserve more attention. Part III focuses on core principles and social processes related to social justice, doing good, social media and approaches to understanding and addressing social issues in Singapore. Most importantly, the chapters in this book clearly identify many of the critical, unresolved and emerging questions on various social issues that will guide the next generation of public discussion and policy deliberations on what matter in Singapore.

Social and Community Development Nov 18 2022 Social and Community Development is an essential introduction to the subject for students, potential practitioners, and activists interested in community action and emancipatory social change. It reflects on the underlying principles of development: what development is, why it is promoted and the implications for practice, indicating potential strategies and goals.

Social Work and Community Development Mar 10 2022 At a time of growing social, economic and environmental challenge, this book offers a fresh and engaging perspective on the connections between social work and community development and on how social workers can use a community development approach to practice in critical, creative and sustainable ways.

The Sources and Development of Social and Community Psychiatry Jun 20 2020 These volumes make new contributions to the history of psychiatry and society in three ways: First, they propose a theory of values and ideology influencing the evolution of psychiatry and society in recurring cycles, and survey the history of psychiatry in recent centuries in light of this theory. Second, they review the waxing, prominence, and waning of Community Mental Health as an example of a segment of this cyclical history of psychiatry. Third, they provide the first biography of Erich Lindemann, one of the founders of social and community psychiatry, and explore the interaction of the prominent contributor with the historical environment and the influence this has on both. We return to the issue of values and ideologies as influences on psychiatry, whether or not it is accepted as professionally proper. This is intended to stimulate self-reflection and the acceptance of the values sources of ideology, their effect on professional practice, and the effect of values-based ideology on the community in

which psychiatry practices. The books will be of interest to psychiatric teachers and practitioners, health planners, and socially responsible citizens.

Community Sport and Social Inclusion Aug 15 2022 This book examines sport as an inclusive and developmental environment, exploring the conditions by which community sport initiatives can promote personal development, health and social cohesion, particularly for at-risk youth. At the empirical core of the book is a multiple disciplinary study of community sport programmes in Flanders, Belgium, involving researchers from social sport sciences, social work, pedagogy and health care sciences. Drawing on this cutting-edge, realist research, the book considers the implications for sport development policy and practice around the world. The book considers community sport as a vehicle for promoting social inclusion, and the ways it allows people of all backgrounds and abilities to participate and access social and health benefits, whilst touching on key issues including monitoring and evaluation; exercise and health; youth welfare, and volunteering. This book is a fascinating reading for any student, researcher or practitioner working in sport for development, sport management, sport coaching, social work, education, sociology or urban studies.

The Community and the Social Worker Feb 09 2022 This text is intended to contribute to an understanding of human behavior in the social environment by providing social work students with an introduction to American communities. The primary focus is on local communities of place. Attention is also given to the communities of interest and identification that are intertwined with geographic communities. Ecological systems and social systems perspectives serve as conceptual and practical frameworks for examining the multiple communities in which people have membership, social identity, and social interaction. This edition begins with an exposition of the societal context of communities. American society is recognized as part of a global community and then examined as a social system, a community of communities, a multicultural society, and a civil society. The book emphasizes the way that discrimination, economic deprivation, and oppression affect populations at risk and demonstrates the role communities play in the pursuit of individual and collective social and economic justice.

Social and Community Medicine for Students Jun 01 2021 Social and Community Medicine for Students presents an extensive examination of the application of medical sociology to community treatment. It discusses the principles behind the scope and methods of epidemiology. It addresses studies in attitudes and illness. Some of the topics covered in the book are the sick role in Western Societies; sickness behavior in a traditional society; statistics vital to social medicine; geographical pathology of cancer; scope and methods of epidemiology; possibilities and limitations of health education; and health in industry and external disability. The definition and description of social provisions for health and welfare are fully covered. An in-depth account of the common features and development of social medicine are provided. The epidemiology

of the cancer of the esophagus is completely presented. A chapter is devoted to description and diagnosis of ischaemic heart disease. Another section focuses on the practical applications of social medicine. The book can provide useful information to doctors, students, and researchers.

Community Organization and Social Administration Jul 02 2021 *Community Organization and Social Administration presents a unique constellation of perspectives from scholars, researchers, and practitioners grounded in macro theories, practice, and education. Drawing upon the knowledge and experiences of social workers and other community-based professionals, this book provides a rich cross-section of models and strategies for those engaged in social change in the community, agency, and school or university. The chapters include data-based practice principles and guidelines for action. This book is a must for those who are teaching and practicing in community service, community change, and planning settings. Others who would benefit from the book include administrators of social service and community agencies; classroom teachers, field instructors, and students in organizing, planning, policy, and administration; policy analysts, program developers, and grant officers; and leaders and organizers of social change organizations, networks, and coalitions. Community Organization and Social Administration incorporates papers presented at the Symposia on Community Organization and Social Administration held at the Annual Program Meeting of the Council on Social Work Education. The papers are edited by members of the Association on Community Organizing and Social Administration (ACOSA).*

Social Justice and Community College Education Nov 25 2020 *This book explores the central role community colleges play in American social justice. The United States has long-standing social and cultural structures that perpetuate inequality along race, ethnicity, and income lines. The primary role of American community colleges is to disrupt these structures on behalf of the students we serve. In this sense, community colleges are called to play a subversive role in contemporary society, but it is a good kind of subversion. Social Justice and Community College Education makes four very important contributions to this conversation: First, the book helps us quantify and understand the size and dimension of the equity gaps in higher education by tracking ten specific student groups from historically underserved communities. Second, the book summarizes best practices research and literature with regard to pedagogy, services, programs, and leadership in community colleges, presenting practical strategies for implementation. Third, through a national survey of community college personnel, the book covers significant new territory in the discussion of work we need to do collaboratively as community colleges. Fourth, this book captures the unique and special mission of American community colleges. Our work is the work of social justice, and we carry this work out in society at a greater volume, with greater intentionality, and through greater expertise than any other sector of higher education.*

In this arena, community colleges should lead.

Community Economic Development in Social Work Sep 23 2020 Community economic development (CED) is an increasingly essential factor in the revitalization of low- to moderate-income communities. This cutting-edge text explores the intersection of CED and social work practice, which both focus on the well-being of indigent communities and the empowerment of individuals and the communities in which they live. This unique textbook emphasizes a holistic approach to community building that combines business and real-estate development with a focus on stimulating family self-reliance and community empowerment. The result is an innovative approach to rehabilitating communities in decline while preserving resident demographics. The authors delve deep into the social, political, human, and financial capital involved in effecting change and how race and regional issues can complicate approaches and outcomes. Throughout, they integrate case examples to illustrate their strategies and conclude with a consideration of the critical role social workers can play in developing CED's next phase.

Social Work as Community Development Apr 30 2021 This title was first published in 2000: The second edition of Social Work as Community Development is thoroughly revised and updated taking into account lessons from community development and international experiences applicable in developed economies. The application of system theory to the problems of managing change is the core theme. The book will be essential reading for the UK DipSW/MScEcon in Applied Social Studies and MScEcon in Community Care Studies as well as for students of community development and social work in the USA, Asia and Australia. It will also be useful for practitioners and policy-makers across social work, social welfare and social policy.

Community Gardening as Social Action Sep 04 2021 There has been a resurgence of community gardening over the past decade with a wide range of actors seeking to get involved, from health agencies aiming to increase fruit and vegetable consumption to radical social movements searching for symbols of non-capitalist ways of relating and occupying space. Community gardens have become a focal point for local activism in which people are working to contribute to food security, question the erosion of public space, conserve and improve urban environments, develop technologies of sustainable food production, foster community engagement and create neighbourhood solidarity. Drawing on in-depth case studies and social movement theory, Claire Nettle provides a new empirical and theoretical understanding of community gardening as a site of collective social action. This provides not only a more nuanced and complete understanding of community gardening, but also highlights its potential challenges to notions of activism, community, democracy and culture.

Community Service and Social Responsibility in Youth Dec 15 2019 An analysis of the beneficial effects of community service on the political and moral identity of adolescents. It uses a case study from a predominantly black, urban high school in Washington, D.C., building on the work of Erik Erikson on the social and historical nature of identity development.

The Social Basis of Community Care (Routledge Revivals) Dec 07 2021 Care for the elderly, disabled and mentally-ill within and by the community forms a vital part of current social policy. Martin Bulmer argues that this policy is inadequately thought out and rests on a series of poorly founded sociological assumptions. As a result there is a vacuum at the heart of government's social care policy which is likely to lead to ineffective or deteriorating provision for those in need. This book, first published in 1987, will be essential reading for all those concerned with the organization and delivery of social care, whether as students, practitioners or teachers. It will be particularly useful for courses dealing with social policy, the personal social services and the social context of social work.

Realizing Community Aug 23 2020 Annotation 'Community' is so overused both in everyday language as well as in scholarly work that it could easily be dismissed as a truism. However, the persistence of the term itself shows that the idea continues to resonate powerfully in our daily lives, ethnographic accounts as well as theoretical analyses. This book returns a timely and concerted anthropological gaze to community as part of a broader consideration of contemporary circumstances of social affiliation and solidarity.

Key Concepts in Social Research Apr 18 2020 `This clearly written and user-friendly book is ideal for students or researchers who wish to get a basic, but solid grasp of a topic and see how it fits with other topics. By following the links a student can easily and efficiently build up a clear conceptual map of social research? - Malcolm Williams, Reader in Sociology, Cardiff University `This is a really useful book, written in an accessible manner for students beginning their study of social research methods. It is helpful both as an introductory text and as a reference guide for more advanced students. Most of the key topics in methods and methodology are covered and it will be suitable as a recommended text on a wide variety of courses? - Clive Seale, Brunel University At last, an authoritative, crystal-clear introduction to research methods which really takes account of the needs of students for accessible, focused information to help with undergraduate essays and exams. The key concepts discussed here are based on a review of teaching syllabi and the authors? experience of many years of teaching. Topics range over qualitative and quantitative approaches and combine practical considerations with philosophical issues. They include several new topics, like internet and phone polling, internet searches, and visual methods. Each section is free-standing, can be tackled in order, but with links to other sections to enable students to cross-reference and build up a wider understanding of central research methods. To facilitate comprehension and aid study, each section begins with a definition. It is followed by a summary of key points with key words and guides to further reading and up-to-date examples. The book is a major addition to undergraduate reading lists. It is reliable, allows for easy transference to essays and exams and easy to use, and exceptionally clearly written for student consumption. The book answers the needs of all those who find research methods daunting, and for those who have dreamt of an ideal introduction to the subject.

Social and Community Development Practice Feb 21 2023 Social and Community Development Practice makes a persuasive case for employing a social development approach to community development practice at local and village levels. Towards this end, the book offers a conceptual clarity of social and community development (SCD) by adding new dimensions. It also shows the significance of social policy education for social and community development workers and the need for expanding community development practice from local levels to international levels. The author argues that the social work profession itself needs to quickly reorganize and strengthen. It needs to

consider alternative modes of preparing social workers and community organizers who can reach out at local levels. The profession also needs to develop indigenous ethical standards for SCD practice. The author's deep reflections reveal the dire need to refocus on SCD practice to address major issues such as poverty and inequality plaguing vast populations around the world.

Community Practice and Social Development in Social Work Feb 15 2020 This book brings together leaders in the field of community practice and social development in social work. The chapters discuss the implications of social development in social work practice, policy, and service structures.

Dynamics of a Social Language Learning Community Jun 13 2022 This book provides an in-depth exploration of psychological phenomena affecting language learning within a social learning space. Drawing on the literature from identity in second language learning, communities of practice and learner beliefs, in conjunction with other individual difference factors, it uncovers perceptions and assumptions that language learners have of the space and how they affect their relationship with it and the people within it. Readers will gain a greater understanding of how psychological phenomena shape a space and how a learning space can contribute to a wider learning ecology. This book will appeal to researchers interested in language learning beyond the classroom and psychological aspects of language acquisition, as well as to practitioners and professionals who are supporting learners outside the classroom.
