Since the end of apartheid, South Africa has become an extreme yet unexceptional embodiment of forces at play in many other regions of the world: intensifying inequality alongside “ wageless life, ” proliferating forms of protest and populist politics that move in different directions, and official efforts at containment ranging from liberal interventions targeting specific populations to increasingly common police brutality. Rethinking the South African Crisis revisits long-standing debates to shed new light on the transition from apartheid. Drawing on nearly twenty years of ethnographic research, Hart argues that local government has become the key site of contradictions. Local practices, conflicts, and struggles in the arenas of everyday life feed into and are shaped by simultaneous processes of de-nationalization and re-nationalization. Together they are key to understanding the erosion of African National Congress hegemony and the proliferation of populist politics. This book provides an innovative analysis of the ongoing, unstable, and unresolved crisis in South Africa today. It also suggests how Antonio Gramsci's concept of passive revolution, adapted and translated for present circumstances with the help of philosopher and liberation activist Frantz Fanon, can do useful analytical and political work in South Africa and beyond. South Africa has achieved a lot on its path of socio-economic transformation since the end of Apartheid in 1994. While many challenges remain to foster inclusive growth to address the triple challenges of unemployment, poverty, and inequality, some innovative approaches have been used to build more inclusive public institutions. These have helped to expand service delivery, strengthen quality, and improve the lives of millions of South Africans. Although much is known about the motivation and nature of the policies and institutional changes that drove this transformation, very little is known of the manner in which they were executed. With this book, Making It Happen, From Policies to Implementation, we offer a selection of twelve case studies to illustrate how policies and institutions were developed and implemented to improve specific public services. Done through interviews with senior policy

makers, the book captures the how to of executing these policies in a variety of areas including increasing budget transparency, developing an intergovernmental fiscal system, strengthening tax administration, developing a modern performance monitoring and evaluation system, expanding HIV/AIDS treatment, reforming the social transfer system, strengthening statistics, creating a modern national identity system, developing a system for the management of biodiversity, modernizing the national road network management, developing the framework for renewable energy, and the formulation of the country ' s much lauded constitution. Tracing a twenty year journey of transformation, this book places particular emphasis on recording the design of these reforms and endeavors to shed some light on the decision-making processes. In particular, it attempts to provide insight on the trade-offs policy makers faced, and the sequencing and complementarities among the various reforms. It finds leadership at different levels, adoption of pragmatic and innovative solutions, and the focus on results as among the key drivers in implementing these changes. This book is primarily intended to enhance knowledge exchange by exporting South Africa ' s development experience to the world. It is a product of the country ' s Knowledge Hub, developed in partnership with the World Bank Group, to provide evidence-based solutions for enhancing service delivery. Described by international curator Okwui Enwezor as "one of the most dynamic and vigorous spaces of artistic practice," contemporary South African art is an exciting, emerging scene that is attracting the attention of international museums, curators, and collectors today. South African Art Now documents, through in-depth essays and stunning full-color photographs, the remarkable work of nearly one hundred South African artists working in every medium from painting, sculpture, and video to cutting-edge performance art. This lush volume includes the impressive work of art world stars such as William Kentridge and Marlene Dumas; newly prominent artists such as Berni Searle, Robin Rhode, and Mustafa Maluka; and exciting newcomers still unknown outside their own country, but clearly marked for success. This book covers forty years of art history, from the dark years of apartheid, which saw the rise of resistance art, to the long-awaited achievement of freedom in 1994, to the present-day struggles for reconciliation and transformation. Through it all, the engaged, powerful work of these artists provided a mirror for society. Including a compelling foreword by Nobel Prize-winning writer Nadine Gordimer, South African Art Now is a must-have resource for collectors, curators, and anyone interested in the pulse of international contemporary art. This book critically examines the persistence of market orthodoxy in post-apartheid South Africa and the civil society resistance such policies have generated over a twenty-five-year period. Each chapter unpacks the key political coalitions and economic dynamics, domestic as well as global, that have sustained neoliberalism in the country since the transition to liberal democracy in 1994. Chapter 1 analyzes the political economy of segregation and apartheid, as well as the factors that drove the democratic reform and the African National Congress ' (ANC) subsequent abandonment of redistribution in favor of neoliberal policies. Further chapters explore the causes and consequences of South Africa ' s integration into the global financial markets, the limitations of the post-apartheid social welfare program, the massive labour strikes and protests that have erupted throughout the country, and the role of the IMF and World Bank in policymaking. The final chapters also examine the political and economic barriers thwarting the emergence of a viable post-apartheid developmental state, the implications of monopoly capital and foreign investment for democracy and development, and the phenomenon of state capture during the Jacob Zuma Presidency. During the final years of the apartheid era and the

subsequent transition to democracy, South African literary writing caught the world's attention as never before. Writers responded to the changing political situation and its daily impact on the country's inhabitants with works that recorded or satirised state-enforced racism, explored the possibilities of resistance and rebuilding, and creatively addressed the vexed question of literature's relation to politics and ethics. *Writing South Africa* offers a window on the literary activity of this extraordinary period that conveys its range (going well beyond a handful of world-renowned names) and its significance for anyone interested in the impact of decolonisation and democratisation on the cultural sphere. It brings together for the first time discussions by some of the most distinguished South African novelists, poets, and dramatists, with those of leading commentators based in South Africa, Britain and North America. This is a book about a heterogeneous section of the South African society usually classed in legal and administrative terms as 'Coloured'. Their numbers total about two million although there are some who say the real figure is closer to three million. Inevitably, it must highlight a vast and at times moving tapestry of inadequacies and injustices for which many South Africans, in an historical and contemporary context, are responsible. What motivated South Africa's former white leaders to hand over the reins of power to a black government? Economist Anton D. Lowenberg examines the economic interests that led to apartheid and the economic prospects for post-apartheid South African society. The overwhelming challenge that South Africa faces, and has to date failed to address, is unemployment, which falls especially on African youths who were promised a better future after 1994. If the current unemployment challenge is not addressed, it will be impossible to sustainably lift many millions of people out of poverty. *How South Africa Works* reviews the country's major economic achievements over the past two decades. Through numerous interviews with politicians, business leaders and analysts, it examines the challenges and opportunities across key productive sectors -- including agriculture, manufacturing, services, and mining -- illustrative of the policy challenges that leaders face. It scrutinises the social grant and education systems to understand if South Africa has established mechanisms for people not only to escape destitution but be ready to be employed, and identifies steps that some of South Africa's most notable entrepreneurs have taken to build world-class enterprises. Recognizing the essential challenge to cultivate more employers to employ people, *How South Africa Works* concludes by offering an agenda and active steps for greater competitiveness for government, business and labor. This book explores the impact of Covid-19, and the associated state lockdown, on rural lives in a former homeland in South Africa. The 2020 Disaster Management Act saw the state sweep through rural areas, targeting funerals and other customary practices as potential 'super-spreader' events. This unprecedented clampdown produced widespread disruption, fear and anxiety. The authors build on path-breaking work concerning local responses to West Africa's Ebola epidemic, and examine the HIV/AIDS pandemic, to understand the impact of the Covid crisis on these communities, and on rural Africa more broadly. To shed light on the role of custom and ritual in rural social change during the pandemic, *Covid and Custom in Rural South Africa* applies long-term historical and ethnographic research; theories of people's science, local knowledge and the human economy; and fieldwork conducted in ten rural South African communities during lockdown. The volume highlights differences between developments in Southern Africa and elsewhere on the continent, while exploring how the former apartheid homelands--commonly, yet problematically, represented as former 'labour reserves'--have since been reconstituted as new home-spaces. In short, it explains why rural people have been so angered by the state's

assault on their cultural practices and institutions in the time of Covid. This book pulls back the curtain on the 'political miracle' of the new South Africa. Despite the promise and optimism surrounding the post-apartheid transition, South African society continues to be highly racialised in its discourses, identities and practices, even within the very strategies that aim to change power relations and heal racialised divisions. Renowned for its brutal past practices, the wine industry in South Africa has long been associated with white power and black exploitation, and remains dogged by continuing allegations of poor working conditions and labour abuses. Through in-depth, longitudinal fieldwork, this book considers how different ethics interact and draws attention to the positive changes and continuing development challenges faced in South Africa. Situating practice at its heart, it brings a novel, everyday and micro-scale dimension to understandings of empowerment in the post-apartheid South African wine industry. It develops a critical analysis of the interplay between practice, as scaled and inherently spatial, and discourse to conceptualise how 'big' concepts such as empowerment are articulated, materialised and experienced at the ground level. Through this, it gives voices to the marginalised who experience 'empowerment', setting these within the context of their relations with the other stakeholders who shape this engagement. This book contributes to broader critical social science debates around ethical development and questions of power and empowerment in development interventions. This is critical to reducing the disconnection between policy aims and realities within development and empowerment initiatives, as well as enabling (ethical) commodities to be strategic in retaining their appeal throughout their networks. Highlights the continuing social unrest and public protest occurring in South Africa's poorest districts. Frequently praised for its democratic transition, South Africa has experienced an almost uninterrupted cycle of social protest since the late 1990s. There have been increasing numbers of demonstrations against the often appalling living conditions of millions of South Africans, pointing to the fact that they have yet to achieve full citizenship. A Turbulent South Africa offers a new look at this historic period in the existence of the young South African democracy, far removed from the idealistic portrait of the Rainbow Nation. Jérôme Tournadre draws on interviews and observations to take the reader from the backstreets of the squatters' camps to international militant circles, and from the immediate, infra-political level to the worldwide anti-capitalist protest movement. He investigates the mechanisms and the meaning of social discontent in light of several different phenomena. These include, the struggle of the poor to gain recognition, the persistent memory of the fight against apartheid, the developments in the political world since the Mandela Years, the coexistence of liberal democracy with a popular politics found in poor and working-class districts, and many other factors that have played a crucial part in the social and political tensions at the heart of post-apartheid South Africa. The South African Truth and Reconciliation Commission (TRC) was set up to deal with the human rights violations of apartheid during the years 1960-1994. However, as Wilson shows, the TRC's restorative justice approach to healing the nation did not always serve the needs of communities at a local level. Based on extended anthropological fieldwork, this book illustrates the impact of the TRC in urban African communities in Johannesburg. While a religious constituency largely embraced the commission's religious-redemptive language of reconciliation, Wilson argues that the TRC had little effect on popular ideas of justice as retribution. This provocative study deepens our understanding of post-apartheid South Africa and the use of human rights discourse. It ends on a call for more cautious and realistic expectations about what human rights institutions can achieve in democratizing countries.

The Limits of Transition: The South African Truth and Reconciliation Commission 20 Years on is an interdisciplinary collection that celebrates and critiques the work of the TRC after 20 years. The authors consider whether the TRC has continued relevance for South Africa. The book further explores the legacy of the 'unfinished business' of the TRC.

Authored by a team of the world's most esteemed travel medicine experts, the Yellow Book is an essential resource for travelers -- and the clinicians overseeing their care -- at home and abroad.

In Media in Postapartheid South Africa, author Sean Jacobs turns to media politics and the consumption of media as a way to understand recent political developments in South Africa and their relations with the African continent and the world. Jacobs looks at how mass media define the physical and human geography of the society and what it means for comprehending changing notions of citizenship in postapartheid South Africa. Jacobs claims that the media have unprecedented control over the distribution of public goods, rights claims, and South Africa's integration into the global political economy in ways that were impossible under the state-controlled media that dominated the apartheid years. Jacobs takes a probing look at television commercials and the representation of South Africans, reality television shows and South African continental expansion, soap operas and postapartheid identity politics, and the internet as a space for reassertions and reconfigurations of identity. As South Africa becomes more integrated into the global economy, Jacobs argues that local media have more weight in shaping how consumers view these products in unexpected and consequential ways. This incisive, deeply informed book introduces post-apartheid South Africa to an international audience. South Africa has a history of racism and white supremacy. This crushing historical burden continues to resonate today. Under President Jacob Zuma, South Africa is treading water. Nevertheless, despite calls to undermine the 1994 political settlement characterized by human rights guarantees and the rule of law, distinguished diplomat John Campbell argues that the country's future is bright and that its democratic institutions will weather its current lackluster governance. The book opens with an overview to orient readers to South Africa's historical inheritance. A look back at the presidential inaugurations of Nelson Mandela and Jacob Zuma and Mandela's funeral illustrates some of the ways South Africa has indeed changed since 1994. Reviewing current demographic trends, Campbell highlights the persistent consequences of apartheid. He goes on to consider education, health, and current political developments, including land reform, with an eye on how South Africa's democracy is responding to associated thorny challenges. The book ends with an assessment of why

prospects are currently poor for closer South African ties with the West. Campbell concludes, though, that South Africa's democracy has been surprisingly adaptable, and that despite intractable problems, the black majority are no longer strangers in their own country. The Worlding of the South African Novel develops from something of a paradox: that despite momentous political transition from apartheid to democracy, little in South Africa's socio-economic reality has actually changed. Poyner discusses how the contemporary South African novel engages with this reality. In forms of literary experiment, the novels open up intellectual spaces shaping or contesting the idea of the "new South Africa". The mediatising of truth at the TRC hearings, how best to deal with a spectacular yet covert past, the shaping for "unimagined communities" of an inclusive public sphere, HIV/AIDS as the preeminent site testing capitalist modernity, white anxieties about land reform, disease as environmental injustice and the fostering of an enabling restorative cultural memory: Poyner argues that through these key nodes of intellectual thought, the novels speak to recent debates on world-literature to register the "shock" of an uneven modernity produced by a capitalist world economy. This unique history highlights South Africa's complex and dynamic attempt to build a developmental state; an attempt that ultimately faltered. In the early sixties, South Africa's colonial policies in Namibia served as a testing ground for many key features of its repressive 'Grand Apartheid' infrastructure, including strategies for countering anti-apartheid resistance. Exposing the role that anthropologists played, this book analyses how the knowledge used to justify and implement apartheid was created. Understanding these practices and the ways in which South Africa's experiences in Namibia influenced later policy at home is also critically evaluated, as is the matter of adjudicating the many South African anthropologists who supported the regime. Uncovers the story of how the politics of queer sexuality have played out in the struggle for multiracial democracy in South Africa

The South Africa Reader is an extraordinarily rich guide to the history, culture, and politics of South Africa. With more than eighty absorbing selections, the Reader provides many perspectives on the country's diverse peoples, its first two decades as a democracy, and the forces that have shaped its history and continue to pose challenges to its future, particularly violence, inequality, and racial discrimination. Among the selections are folktales passed down through the centuries, statements by seventeenth-century Dutch colonists, the songs of mine workers, a widow's testimony before the Truth and Reconciliation Commission, and a photo essay featuring the acclaimed work of Santu Mofokeng. Cartoons, songs, and fiction are juxtaposed with iconic documents, such as "The Freedom Charter" adopted in 1955 by the African National Congress and its allies and Nelson Mandela's "Statement from the Dock" in 1964. Cacophonous voices—those of slaves and indentured workers, African chiefs and kings, presidents and revolutionaries—invite readers into ongoing debates about South Africa's past and present and what exactly it means to be South African. "Resistance Art" was Sue Williamson's classic account of the visual art against apartheid. First published in 1989, it soon became a bestseller. Editions were sold in the United States and the UK, and the South African edition sold out within a few years. Because of continuing demand, this landmark work has now been reprinted with a new preface, so as to make the art of the 1980s and 1990's available to a new generation of readers and art lovers. This book surveys South African history from the discovery of gold in the Witwatersrand in the late nineteenth century to the first democratic elections in 1994. Written by many of the leading historians of the country, it pulls together four decades of scholarship to present a detailed overview of South Africa during the twentieth century. It covers political, economic, social, and intellectual

developments and their interconnections in a clear and objective manner. This book, the second of two volumes, represents an important reassessment of all the major historical events, developments, and records of South Africa and will be an important new tool for students and professors of African history worldwide, as well as the basis for further development and research. South Africa was born in war, its growth has been marked by crises and ruptures, and it once again stands on a precipice. *History of South Africa* explores the country's tumultuous journey from the aftermath of the Second Anglo-Boer War to the COVID-19 pandemic. Drawing on never-before-published documentary evidence – including diaries, letters, eyewitness testimony and diplomatic reports – the book follows the South African people through the battles, elections, repression, resistance, strikes, insurrections, massacres, economic crashes and health crises that have shaped the nation's character. Tracking South Africa's path from colony to Union and from apartheid to democracy, *History of South Africa* documents the influence of key figures including Pixley Seme, Jan Smuts, Lilian Ngoyi, H.F. Verwoerd, Nelson Mandela, Steve Biko, P.W. Botha, Thabo Mbeki, Jacob Zuma and Cyril Ramaphosa. The book gives detailed accounts of definitive events such as the 1922 Rand Revolt, the Defiance Campaign, Sharpeville, the Soweto uprising and the Marikana massacre. Looking beyond the country's borders, it sheds light on the role of people such as Mohandas Gandhi, Winston Churchill, Fidel Castro and Margaret Thatcher, and unpacks military conflicts such as the World Wars, the armed struggle and the Border War. The book explores the transition to democracy and traces the phases of ANC rule, from the Rainbow Nation to transformation, state capture to 'New Dawn'. It examines the divisive and unifying role of sport, the ups and downs of the economy, and the impact of pandemics from the Spanish flu to AIDS and COVID-19. With South Africa currently facing a crisis as severe as any in its history, the book shows that these challenges are neither unprecedented nor insurmountable, and that there are principles to be found in history that may lead us safely into the future. A wide-ranging guide to language and society in South Africa. The book surveys the most important language groupings in the region in terms of wider socio-historical processes; contact between the different language varieties; language and public policy issues associated with post-apartheid society and its eleven official languages. "At a strategic time in South Africa's history, the Christian history which is absolutely basic to all developments, is presented in a comprehensive and objective way. Too little attention is given to the influence of religion in socio-political accounts. This is a creative and much-needed contribution to scholarship and general knowledge. . . . An outstanding work."--Dean S. Gilliland, Fuller Theological Seminary

Reexamines the history of South Africa, traces the development of apartheid, and describes the anti-apartheid movement Sought after by European aristocrats and a favorite of Napoleon Bonaparte, the sweet wines of Constantia in the Cape Colony were considered to be among the world's best during the eighteenth and nineteenth centuries. During the first democratic elections in 1994, South Africa began to re-emerge onto the international wine scene. Tim James, an expert on South African wines, takes the reader on an information-packed tour of the region, showing us how and why the unique combination of terroir and climate, together with dramatic improvements in winemaking techniques, result in wines that are once again winning accolades. James describes important grape varieties and wine styles—from delicate sparkling, to rich fortified, and everything in between—including the varietal blends that produce some of the finest Cape wines. Anchoring his narrative in a rich historical context, James discusses all the major wine regions, from Cederberg to Walker Bay, complete with profiles of more than 150 of the country's finest

producers. The new edition of the atlas (first published as *The Atlas of Apartheid*) presents a comprehensive introduction and detailed analysis of the spatial impact of apartheid in South Africa. It covers the period of the National Party Government of 1948 to 1994, and emphasises the changes and the continuing legacy this presents to South Africans at the start of the 21st century. The Atlas makes the unique contribution of presenting the policy and its impact in visual, spatial forms by including over 70 maps, a highly appropriate method considering that apartheid was about the control of space and specific places. A pioneering account of how South Africa's three leading cities were fashioned, experienced, promoted and perceived. While much has been written on post-apartheid social movements in South Africa, most discussion centers on ideal forms of movements, disregarding the reality and agency of the activists themselves. In *Living Politics*, Kerry Ryan Chance radically flips the conversation by focusing on the actual language and humanity of post-apartheid activists rather than the external, idealistic commentary of old. Tracking everyday practices and interactions between poor residents and state agents in South Africa's shack settlements, Chance investigates the rise of nationwide protests since the late 1990s. Based on ethnography in Durban, Cape Town, and Johannesburg, the book analyzes the criminalization of popular forms of politics that were foundational to South Africa's celebrated democratic transition. Chance argues that we can best grasp the increasingly murky line between "the criminal" and "the political" with a "politics of living" that casts slum and state in opposition to one another. *Living Politics* shows us how legitimate domains of politics are redefined, how state sovereignty is forcibly enacted, and how the production of new citizen identities crystallize at the intersections of race, gender, and class. A Canadian woman shares her story of traveling to South Africa to teach Boer children in concentration camps following the South African War. As the South African War reached its grueling end in 1902, colonial interests at the highest levels of the British Empire hand-picked teachers from across the Commonwealth to teach the thousands of Boer children living in concentration camps. Highly educated, hard working, and often opinionated, E. Maud Graham joined the Canadian contingent of forty teachers. Her eyewitness account reveals the complexity of relations and tensions at a controversial period in the histories of both Britain and South Africa. Graham presents a lively historical travel memoir, and the editors have provided rich political and historical context to her narrative in the Introduction and generous annotations. This is a rare primary source for experts in Colonial Studies, Women's Studies, and Canadian, South African, and British Imperial History. Readers with an interest in the South African War will be intrigued by Graham's observations on South African society at the end of the Victorian era. "A fascinating perspective on the country. . . . Graham's account will help others understand how the British and English-speaking Canadians in South Africa perceived Boers and native southern Africans at the turn of the twentieth century, and her descriptions reveal details about everyday life in South Africa at an important moment of transition.... Graham's book represents the perspective of a well-embedded outsider reporting to far-removed readers, rather than that of a female teacher involved in international or imperial education." —Benjamin Bryce, *Historical Studies in Education* "Recommended for those who wish to learn more about South African history and early race relations or tensions. Graham's opinionated writing will amuse and interest those researching women's studies." —Amy L. Crofford, *African Studies Quarterly*, Volume 16 When Nelson Mandela emerged from decades in jail to preach reconciliation, South Africans truly appeared a people reborn as the Rainbow Nation. Yet, a quarter of a century later, the country sank into bitter recriminations and

rampant corruption under Jacob Zuma. Why did this happen, and how was hope betrayed? President Cyril Ramaphosa, who is seeking to heal these wounds, is due to lead the African National Congress into an election by May 2019. The ANC is hoping to claw back support lost to the opposition in the Zuma era. This book will shed light on voters' choices and analyze the election outcome as the results emerge. With chapters on all the major issues at stake--from education to land redistribution-- *Understanding South Africa* offers insights into Africa's largest and most diversified economy, closely tied to its neighbors' fortunes. Under apartheid, black South Africans experienced severe material and social disadvantages occasioned by the government's policies, and they had limited time for entertainment. Still, they closely engaged with an array of textual and visual cultures in ways that shaped their responses to this period of ethical crisis. Marshaling forms of historical evidence that include passbooks, memoirs, American "B" movies, literary and genre fiction, magazines, and photocomics, *Black Cultural Life in South Africa* considers the importance of popular genres and audiences in the relationship between ethical consciousness and aesthetic engagement. This study provocatively posits that states of oppression, including colonial and postcolonial rule, can elicit ethical responses to imaginative identification through encounters with popular culture, and it asks whether and how they carry over into ethical action. Its consideration of how globalized popular culture "travels" not just in material form, but also through the circuits of the imaginary, opens a new window for exploring the ethical and liberatory stakes of popular culture. Each chapter focuses on a separate genre, yet the overall interdisciplinary approach to the study of genre and argument for an expansion of ethical theory that draws on texts beyond the Western canon speak to growing concerns about studying genres and disciplines in isolation. Freed from oversimplified treatments of popular forms—common to cultural studies and ethical theory alike—this book demonstrates that people can do things with mass culture that reinvigorate ethical life. Lily Saint's new volume will interest Africanists across the humanities and the social sciences, and scholars of Anglophone literary, globalization, and cultural studies; race; ethical theories and philosophies; film studies; book history and material cultures; and the burgeoning field of comics and graphic novels. *Love history? Know your stuff with History in an Hour.* Over the last fifteen years, the South African postapartheid Transitional Amnesty Process – implemented by the Truth and Reconciliation Commission (TRC) – has been extensively analyzed by scholars and commentators from around the world and from almost every discipline of human sciences. Lawyers, historians, anthropologists and sociologists as well as political scientists have tried to understand, describe and comment on the 'shocking' South African political decision to give amnesty to all who fully disclosed their politically motivated crimes committed during the apartheid era. Investigating the postapartheid transition in South Africa from a multidisciplinary perspective involving constitutional law, criminal law, history and political science, this book explores the overlapping of the postapartheid constitution-making process and the Amnesty Process for political violence under apartheid and shows that both processes represent important innovations in terms of constitutional law and transitional justice systems. Both processes contain mechanisms that encourage the constitution of the unity of the political body while ensuring future solidity and stability. From this perspective, the book deals with the importance of several concepts such as truth about the past, publicly shared memory, unity of the political body and public confession.
