The book as the subject of a distinct historical discipline dates from the landmark publication of *L'Apparition du livre* by Lucien Febvre and Henri-Jean Martin in 1958. In this further contribution to his pathbreaking work with Febvre, eminent French historian Henri-Jean Martin explores the role of the book and book industry in early modern France. Martin begins with a sweeping look at the revolutionary role played by the new technology of printing in Europe of the Renaissance and Reformation. Shifting the focus to France, he then examines the political implications of publishing in the reign of Francis I, including such topics as the founding of royal and university libraries, the role of church-state relations, Richelieu's cultural program, and censorship. In revealing case studies of Rouen and Grenoble, Martin pinpoints precisely which books were sold and to which social groups, and explains why the initially successful printers of Rouen were eventually forced out of business by the Parisian courts. Martin also casts a discerning eye on early graphic design—from the first illustrated "coffee table" books purchased by the newly rich to the invention of the paragraph to facilitate reading. And he shows how attempts by the French government to suppress and control publication were eventually thwarted by free market forces from Amsterdam and Neufchatel. This is a book that will be of interest to those who study the history of the book, intellectual history of early modern Europe, and the relation between politics and ideas. A language barrier is no match for love. Lauren Collins discovered this firsthand when, in her early thirties, she moved to London and fell for a Frenchman named Olivier—a surprising turn of events for someone who didn't have a passport until she was in college. But what does it mean to love someone in a second language? Collins wonders, as her relationship with Olivier continues to grow entirely in English. Are there things she doesn't understand about Olivier, having never spoken to him in his native tongue? Does "I love you" even mean the same thing as "je t'aime"? When the couple, newly married, relocates to Francophone Geneva, Collins—fearful of one day becoming "a Borat of a mother" who doesn't understand her own kids—decides to answer her questions for herself by learning French. When in French is a laugh-out-loud funny and surprising memoir about the lengths we go to for love, as well as an exploration across culture and history into how we learn languages—and what they say about who we are. Collins grapples with the complexities of the French language, enduring excruciating role-playing games with her classmates at a Swiss language school and accidentally telling her mother-in-law that she's given birth to a coffee machine. In learning French, Collins must wrestle with the very nature of French identity and society—which, it turns out, is a far cry from life back home in North Carolina. Plumbing the mysterious depths of humanity's many forms of language, Collins describes with great style and wicked humor the frustrations, embarrassments, surprises, and, finally, joys of learning—and living in—French. At head of cover title and half t.p. title: *Living language*. A complete short-title catalogue of all books published in the French language before 1601.

"Géophysique, an association ... who decided to translate the papers prepared by Paul Le Bourdiac, Christian Jost, and Frédéric Angleviel for the 1994 Geographical Study Days organized by the French National Geographic Committee in Tahiti, New Caledonia and Wallis and Futuna"--P. 8. In 1920s France the far-right peasantry wanted an authoritarian and agrarian society. This study examines their singular lack of success and the enduring French perception of themselves as a peasant nation. This text re-evaluates the development of the appeasement policy by which Western democracies sought to avoid World War II. Utilizing contemporary documents, it asserts that the policy of peace at any price was a moral and strategic failure and that French leaders ignored more viable options.
