**The Internet Is Not the Answer** Sep 21 2020 The renowned Internet commentator and author of *How to Fix the Future* “expos[es] the greed, egotism and narcissism that fuels the tech world” (Chicago Tribune). The digital revolution has contributed to the world in many positive ways, but we are less aware of the Internet’s deeply negative effects. *The Internet Is Not the Answer*, by longtime Internet skeptic Andrew Keen, offers a comprehensive look at what the Internet is doing to our lives. The book traces the technological and economic history of the Internet, from its founding in the 1960s through the rise of big data companies to the increasing attempts to monetize almost every human activity. In this sharp, witty narrative, informed by the work of other writers, reporters, and academics, as well as his own research and interviews, Keen shows us the tech world, warts and all. Startling and important, *The Internet Is Not the Answer* is a big-picture look at what the Internet is doing to our society and an investigation of what we can do to try to make sure the decisions we are making about the reconfiguring of our world do not lead to unpleasant, unforeseen aftershocks. “Andrew Keen has written a very powerful and daring manifesto questioning whether the Internet lives up to its own espoused values. He is not an opponent of Internet culture, he is its conscience, and must be heard.” —Po Bronson, #1 New York Times–bestselling author

But what if the happy families are actually the most unusual of all? Paul Essinger is a mid-ranking tennis professional on the ATP tour. His girlfriend Dana is an ex-model and photographer, and the mother of their two-year-old son, Cal. Together they form a tableau of the contented upper-middle-class New York family. But summer storms are blowing through Manhattan, and Paul's parents have come to stay in the build-up to the US Open. Over the course of the weekend, several generations of domestic tension are brought to boiling point . . . What does it mean to be a family? To be an individual? And how do we deal with the responsibilities these roles impose upon us? *A Weekend In New York* intertwines the politics of the household and the state to forge a luminous national portrait on a deceptively local scale. From a Rational Point of View Jul 12 2022 When discussing normative

reasons, oughts, requirements of rationality, motivating reasons, and so on, we often have to use verbs like "believe" and "want" to capture a relevant subject's perspective. According to the received view about sentences involving these verbs, what they do is describe the subject's mental states. Many puzzles concerning normative discourse have to do with the role that mental states consequently appear to play in normative discourse. Tim Henning uses tools from semantics and the philosophy of language to develop an alternative account of sentences involving these verbs. According to this view, which is called parentheticalism, we very commonly use these verbs in a parenthetical sense. These verbs themselves express backgrounded side-remarks on the contents they embed, and these latter, embedded contents constitute the at-issue contents. This means that instead of speaking about the subject's mental states, we often use sentences involving "believe" and "want" to speak about the world from her point of view. Henning makes this notion precise, and uses it to solve various puzzles concerning normative discourse. The final result is a new, unified understanding of normative discourse, which gets by without postulating conceptual breaks between objective and subjective normative reasons, or normative reasons and rationality, or indeed between the reasons we ascribe to an agent and the reasons she herself can be expected to cite. Instead of being connected to either subjective mental states or objective facts, all of these normative statuses are can be adequately articulated by citing worldly considerations from a subject's point of view.
