This book is suitable for children and adults who are about to start piano, keyboard or organ lessons. This book is aimed specifically at beginners who want to learn to play a keyboard instrument, this can be piano, electronic keyboard and electric organ. I actually wrote this book for myself to use as a resource when I teach new students how to play the piano. Since every piano keyboard player has had to learn what's in this book, it made sense to create a book that's easy to follow and can easily be shared. This learn to play piano book should be used before you buy a course book, in fact it should be the first book you go to before you start to play the piano. All keyboard players know this information, all piano teachers will teach you the information in this book before giving you sheet music to play. This is not a learn to play in 24 hours book, its not for advanced players, there's no secrets in this book, the info in this book is freely available if you want to search for it. I like to call the info in this piano book "essential information" for students who know nothing about music theory and playing the piano. Here's what's in this book: 01 Note names on the keyboard In this section you will learn all the white notes on a keyboard 02 The staff Here we show what the staff looks like and what symbols you can expect to see in lesson 1. 03 Notes on the staff Here you will learn what the notes are called on the staff. 04 Middle C Here you will find where middle C is on the staff and the keyboard 05 Note values Discover music notes used in lesson 1 with different beat values 06 Hand position Hand shape and position on the keyboard. 07 5 finger exercise This is your first exercise to get those fingers working. 08 Read the notes you are playing Here you will read the notes in the 5-finger exercise. 09 Finger numbers Learn what each fingers number is. 10

Play your first piece of music Here you will play your first piece of music with your right hand Piano teachers can use this book as a teaching aid for new students. Beginners can use this if they want to have a go themselves. I have used the methods outlined in this book for over thirty years teaching my own new students. My name is Michael Shaw, I hope you find this book useful, Good luck with your music. Who am I to write a book on this subject? Am I really an expert on this? I spoke with more and more people who have known me for a long time and know my history. They all gave me a resounding, "Yes! You are in the business and have seen all areas of the business, go for it!" In my travels all around the world, many aspiring artists and musicians have asked me questions about touring. Many of the questions are similar, but some really stand out. Nevertheless, I've always made notes on what questions were asked. When I started writing this book, I quickly realized I was writing more than just a book on touring. It is a guide for the music business and solid musicianship in general. This is for the working musician who may play on the weekends for a hobby, but aspires to do more. Some "Notes" may be fairly basic. Others are for the advanced musician, who has already moved to Nashville, L.A., or New York. Everything in this collection is for any musician (or music lover) looking for secrets and tips about being on the road and beyond. This book is a personal account of this business from my humble opinion and experiences. Some may agree on certain points and some certainly will not. Often, there are no clear-cut guidelines in this business. The following notes are some of mine. Enjoy your read and leverage my experiences (and mistakes) to help you on your musical journey. I hope it helps you become successful in whatever aspect of the business you pursue. Don't let anyone stop you... go for it! Click the Buy Now button and learn to make music We call this series "I don't read music" since we are targeting beginners of all ages: children, teens, parents, grandparents. Folk music traditionally is not learned from sheet music or notes. Instead, it is learned by repetition and from being passed from generation to generation. We believe in this method of teaching, which is easier and more enjoyable. This songbook includes 65 familiar and easy-to-play songs and melodies. Most songs have been simplified and transposed for one octave. So the songbook is suitable even for a diatonic 8-note kalimba in C-scale, and 10- or 17-note as well. Since this book is aimed at the absolute beginner without any knowledge of reading music, we do not use here the classical music staff and do not show the note duration. You can experiment with the duration on your own. We recommend finding each of these songs on YouTube and listening to the rhythm before beginning to play. Our sheet music is only a guide. The most important thing is to listen and repeat the recordings. If you are a beginner, playing by note can be difficult. It is easier to follow number-coded circles in this songbook. By simply following the numbers, you will sound like an experienced musician.
