Pollution has no borders. This popular 70's saying from early ecologists is surprisingly still true nowadays despite overwhelming scientific evidence and public awareness of the occurrence of artificial toxic substances in water, food, air, living organisms and the environment. This book presents advanced reviews on pollutant occurrence, transfer, toxicity and remediation. The chapter on school air quality by Dambruoso et al. highlights the overlooked health issue of airborne pollutants in buildings. Children are particularly threatened because they spend 90% of their time indoors, even in summer. The chapter on industrial wastewater pollutants by Dsikowitzky and Schwarzbauer reviews pollutants from textile, petrochemical, paper, tire, chemical and pharmaceutical plants. The authors describe advanced analytical methods and ecotoxicity tests. Industrial pollutants include dioxins and furans that are also reviewed in the chapter by Mudhoo et al. The chapter on fly ash by Gianoncelli et al. presents many techniques to treat fly ash and, in turn, decrease pollutant concentrations. The authors also explain that fly ash can be recycled in agriculture, buildings and geopolymers. The chapter on antifouling paints used for ship protection, by Sousa et al., highlights the occurrence of toxic organotins in human organs such as heart, liver and breast milk. The chapter on surfactants by Rebello et al. focuses on safety concerns for

humans and the ecosystems. Remediation techniques and green surfactants are presented. The chapters on toxic metals by Nava-Ruíz and Méndez-Armenta, Abarikwu and Risti? et al. describe sources, monitoring and diseases induced by lead, mercury, cadmium and thallium. The chapter on carcinogenic nitrosamines by Li et al. presents techniques and materials such as zeolites to remediate liquids and smoke containing nitrosamines. An inspiring, frank, and engaging "spiritual autobiography" that will touch anyone seeking deeper meaning in their religious life. As we come to recognize the need to nurture our spiritual lives as adults, *The Year Mom Got Religion* offers sensitive and intelligent wisdom from a woman who learned how awakening to religion can transform--and disrupt--a life. Lee Meyerhoff Hendler relates her awakening to Judaism. She also shares the hard lessons and realizations she confronted during the process. Her journey of the spirit is a powerful reminder that anyone, at any moment, can fully embrace faith--and meet every one of the challenges that occur along the way. A poignant personal testimony of the discoveries, achievements, and disappointments of a woman's renewed commitment to her faith--and how her personal transformation deeply affected her lifestyle and relationships. Born into a wealthy and prestigious family, Lee Meyerhoff Hendler was surrounded by privilege and was a rising leader in the Jewish community. Despite her prominence, she realized that something was lacking--and that Judaism needed to be more about spiritual fulfillment and relating to God than about simply writing checks to important causes or sitting on the boards of distinguished organizations. Hendler discovered a void in her life that only Judaism could fill. She embarked upon a journey that took her through intensive study, regular synagogue attendance, renewed dedication to Jewish communal service, squabbles with her children about attending religious school, and quarrels with her husband about religion's sudden role in their daily lives. If you are seeking deeper spiritual meaning in your life, or are close to someone who has embarked upon a similar journey, *The Year Mom Got Religion* offers candid and intelligent words of encouragement for the soul.
