In this, another collection of classic cricket writing by Sir Neville Cardus, he urges that the game itself is more important than winning, players should fully express themselves in the game and he writes about those players who delight the senses: Hurst and Hutton, McCabe and Compton. There are essays on the Indians, West Indians and the 1948 Australians who Cardus considered the best team ever to visit England. An outstanding article describes an innings by Compton that he believed to be 'champagne for the connoisseur, ginger pop for the boys'. Letters between Earl of Elgin when Governor General of Canada and Earl Grey, Secretary of State for the Colonies. Conversations such as these are good therapy for the soul and should be held at least once a month. Taking time out to share is important and the way the book is written, the characters could be any two or three individuals. The book allows you to insert yourself and whomever you choose to have a conversation with. At first when the Lord did not provide names of the main characters, I could not understand why but when He began to reveal to me that it is done intentionally because it affords the readers the chance to plug in their own name and the names of friends. There is enough time for formality and to me when sharing in this type of setting; it removes barriers so you can let your hair down. I hope everyone who reads these books is richly blessed by the conversations and are able to share in it with us. Many British politicians, planters, and doctors attempted to exploit the fertility of Afro-Caribbean women's bodies in order to ensure the economic success of the British Empire during the age of abolition. Abolitionist reformers hoped that a homegrown labor force would end the need for the Atlantic slave trade. By establishing the ubiquity of visions of fertility and subsequent economic growth during this time, *The Politics of Reproduction* sheds fresh light on the oft-debated question of whether abolitionism was understood by contemporaries as economically beneficial to the plantation colonies. At the same time, Katherine Paugh makes novel assertions about the importance of Britain's Caribbean colonies in the emergence of population as a political problem. The need to manipulate the labor market on Caribbean plantations led to the creation of new governmental strategies for managing sex and childbearing, such as centralized nurseries, discouragement of extended breastfeeding, and financial incentives for childbearing, that have become commonplace in our modern world. While assessing the politics of reproduction in the British Empire and its Caribbean colonies in relationship to major political events such as the Haitian Revolution, the study also focuses in on the island of Barbados. The remarkable story of an enslaved midwife and her family illustrates how plantation management policies designed to promote fertility affected Afro-Caribbean women during the late eighteenth and early nineteenth centuries. *The Politics of Reproduction* draws on a wide variety of sources, including debates in the British Parliament and the Barbados House of Assembly, the records of Barbadian plantations, tracts about plantation management published by doctors and plantation owners, and missionary records related to the island of Barbados. Zane Grey (January 31, 1872 - October 23, 1939) was an American author best known for his popular adventure novels and stories that presented an idealized image of the American frontier, including the novel *Riders of the Purple Sage*, his best selling book. These are his stories. A hitherto unattempted survey of social legislation by the East India Company, this book identifies the principles of Public Justice and Public Instruction as the inspiration for legislative decisions, some of which resonate in post-colonial India. It dwells particularly on legislation which manipulated Muslim criminal law in order to protect, and in some instances, create, the rights of women, slaves, bonded labourers and victims of crime. It also examines the Company's cautious venture into the realm of civil law affecting the ideals of religious toleration, remarriage of Hindu widows as well as inheritance and property law. Finally, it considers excise as a regulatory instrument in the Company's administration of Pilgrim Taxes and Abkarry

revenue from liquor and opium. The book traces the journey of the small group of merchants, who initially formed the East India Company, and while enviously guarding their sometimes piratical commercial interests, actually became a burgeoning nation state. It shows how... This book covers Sir Charles Grey's glorious (but ultimately ill-fated) West Indies campaign in the early years of the Napoleonic period. Letters between Earl of Elgin when Governor General of Canada and Earl Grey, Secretary of State for the Colonies. This work shows the extent to which the shipping of Africans to the Americas continued after the Abolition Act of 1807. The naval historian and retired merchant navy captain recounts the contributions of Britain's civilian ships during WWII in this "cracking read" (The Bridgend & Porthcawl Gem). The first British casualties of the Second World War were not members of the Royal Navy, the army, or the Royal Air Force. They were British merchant seamen on the transatlantic passenger liner SS Athenia, torpedoed by a German U-30 submarine on September 3, 1939. For the duration of the war, Britain's merchant fleet performed a vital role, carrying the essential supplies that kept the country running during the darkest days and made victory possible. Their achievements came at a terrible cost with 2,535 British oceangoing merchant ships being sunk and, of the 185,000 men and women serving in the British Merchant Navy at the time, 36,749 sacrificed their lives. Another 4,707 were wounded and 5,720 ended up as prisoners of war. Their casualty rate of twenty-five percent was second only to RAF Bomber Command's. Thoroughly researched and full of fascinating true accounts, Bernard Edwards's Churchill's Thin Grey Line tells the inspiring story of those brave civilian volunteers who fought so gallantly to defend their ships, cargo, and country. "A cracking read which brings home to the reader how much we in [England] owe to the Merchant Navy . . . Bernard Edwards has done them proud." —The Bridgend & Porthcawl Gem The Napoleonic Wars was truly a world-wide conflict and Britain found itself engaged in battles, sieges and amphibious operations around the globe. Following every battle the commanding officer submitted a report back to the Admiralty or the War Office. Presented here together for the first time are those original despatches from some forty generals, captains and admirals detailing more than eighty battles that took place in India, Africa, Europe and the Americas. This unique collection of original documents will prove to be an invaluable resource for historians, students and all those interested in what was one of the most important periods in British military and naval history. The reports include those from some of Britain's most famous battles, the likes of Trafalgar and Waterloo, as well as less well-known but just as important engagements which resulted in the capture of the islands and territories which helped form the greatest empire the world has ever known.
