insightful volume offers a radical reassessment of the infamous  
"Gulag Archipelago" by exploring the history of Vorkuta, an  
arctic coal-mining outpost originally established in the 1930s as  
a prison camp complex. Author Alan Barenberg's eye-opening  
study reveals Vorkuta as an active urban center with a  
substantial nonprisoner population where the borders  
separating camp and city were contested and permeable,  
enabling prisoners to establish social connections that would  
eventually aid them in their transitions to civilian life. With this  
book, Barenberg makes an important historical contribution to  
our understanding of forced labor in the Soviet Union and its

... A periodical work exclusively devoted to agriculture and rural affairs. Includes "Rätomoransische Chrestomathie, Hrsg. von Dr. C. Decurtins." "Like other evangelical kids, Jesse James DeConto felt called to shine the light of truth into the world. His job as a journalist and his young marriage, though, would radically change him. First, he learned that Christians have no corner on truth: Working out in the world, trying to be the "Roaring Lamb" he'd been trained to be, he met atheists and agnostics who seemed to do better at embodying Christian love than many Christians did. Confessing the church's failures was one thing, but the author had to face his own weakness the hard way, when the cheap threads that held his marriage intact finally snapped. Jesse found himself at the end of his twenties with a broken bank account, a broken body, and a broken family. In the midst of that pain, he discovered his brokenness better equipped him to share God's grace than his striving ever had. He learned to say with theologian Karl Barth that "his importance may consist in his poverty, in his hopes and fears, in his waiting and hurrying, in the direction of his whole being toward what lies beyond his horizon and beyond his power." " This book provides a comprehensive review of the state-of-the-art in the development of new and innovative materials, and of advanced modeling and characterization methods for nanoscale CMOS devices. Leading global industry bodies including the International Technology Roadmap for Semiconductors (ITRS) have created a forecast of performance improvements that will

be delivered in the foreseeable future – in the form of a roadmap that will lead to a substantial enlargement in the number of materials, technologies and device architectures used in CMOS devices. This book addresses the field of materials development, which has been the subject of a major research drive aimed at finding new ways to enhance the performance of semiconductor technologies. It covers three areas that will each have a dramatic impact on the development of future CMOS devices: global and local strained and alternative materials for high speed channels on bulk substrate and insulator; very low access resistance; and various high dielectric constant gate stacks for power scaling. The book also provides information on the most appropriate modeling and simulation methods for electrical properties of advanced MOSFETs, including ballistic transport, gate leakage, atomistic simulation, and compact models for single and multi-gate devices, nanowire and carbon-based FETs. Finally, the book presents an in-depth investigation of the main nanocharacterization techniques that can be used for an accurate determination of transport parameters, interface defects, channel strain as well as RF properties, including capacitance-conductance, improved split C-V, magnetoresistance, charge pumping, low frequency noise, and Raman spectroscopy. Este libro es parte de la colección e-Libro en BiblioBoard. Compact, comprehensive, and easy to use, The Oxford Italian Desk Dictionary is ideal for travelers, professionals, business people, and students of either language. Melanie has spent far too much time wallowing in grief, avoiding topics of love, going so far as to tell her second grade class that Valentine's Day no longer exists. A vacation to

a relaxing Bed & Breakfast is just what she needs to reset her life. The innkeeper takes it upon herself to push Melanie out of her comfort zone and helps her learn how to find a little bit of happiness, one sugar cube at a time. But the vacation quickly turns from carefree to out of control? A moving tale of taking control of one's life and all that it has to throw in your way. Melanie even learns how to fry an egg, which apparently does not mean deep frying an egg. Pixie's B&B - Where all your woes come to the surface so you can finally conquer your fears. A compact, intermediate-level dictionary covering over 90,000 words and phrases, and 120,000 translations ideal for the home, office, or school. Sangwali, a nondescript little village situated in the deepest Caprivi Strip (currently called the Zambezi Region in the extreme northeast of Namibia) is the

venue for a historic encounter between the famous missionary and African explorer, Dr. David Livingstone and Sebitwane, Chief of the great Makololo tribe. He had fled with his men and their families from their powerful enemies to safety in the marshes of the Linyanti River. A tragedy occurring many years ago, depicts the history of African missionary work from a very different view. After more than 150 years, the Mayeyi tribe still recount the time when they were enslaved to the Makololo, their sorrowful existence and the agonizing death of a group of English missionaries and their families; whom they firmly believe were poisoned by the cruel Makololo successor, Chief Sekeletu. Only one of the missionaries, Roger Price, and two young children from the Helmore family, survived this ordeal. They took the diaries of the deceased to England, describing their hardship on the banks of the Linyanti, a haven where they were to build a mission station bringing the Christian faith to the savage tribe. A German entrepreneur and traveler recently established "Livingstone's Camp" situated in this untouched landscape of indescribable beauty. The camp not only gives access to the wild romantic Nkasa Rupara (former Mamili) National Park, but also provides a historical connection to the missionaries and the Makololo tribe. A young and educated Mayeyi, a direct descendant of the slaves, built a small thatched "Livingstone's Museum", commemorating the incredible events taking place in this paradise. This is their story ... In a world where laws restrict nearly every move people make, baseball pitcher Puppy Nedick and his ex-wife Annette are on the run. Branded by their government as American traitors and murderers, they and their friends must now navigate the chaotic remnants of London. As Puppy faces

an uncertain future run by secret police, robots, and holograms, he is determined to save the world using the only weapon he has—baseball. Beginning with the environment in which Fethullah Gulen was raised and the dynamics that formed his character, this biographical novel captures the very essence of his exemplary life story by shedding light on the crucial events and memories that left their mark in the lives of Gulen and the dedicated philanthropic people inspired by him. The life of Fethullah Gulen, a prominent Turkish Muslim scholar and a source of inspiration for millions, is a life of epic struggle for the sublime cause he is devoted to. There was no change in his disposition and resolve although he was tested with the most severe hardships and persecutions throughout his life. It is an inspiring story of tears, painful displacements, migrations, perseverance, endurance, and triumph. Situated at the intersection of animal studies and literary theory, this book explores the remarkable and subtly pervasive web of animal imagery, metaphors, and concepts in the work of the Jewish-Italian writer, chemist, and Holocaust survivor Primo Levi (1919-1987). Relatively unexamined by scholars, the complex and extensive animal imagery Levi employed in his literary works offers new insights into the aesthetical and ethical function of testimony, as well as an original perspective on contemporary debates surrounding human-animal relationships and posthumanism. The three main sections that compose the book mirror Levi's approach to non-human animals and animality: from an unquestionable bio-ethical origin ("Suffering"); through an investigation of the relationships between writing, technology, and animality ("Techne"); to a creative intellectual project in which literary animals both

counterbalance the inevitable suffering of all creatures, and suggest a transformative image of interspecific community (Creation). The new edition of the most detailed and comprehensive single-volume reference on major semiconductor devices The Fourth Edition of Physics of Semiconductor Devices remains the standard reference work on the fundamental physics and operational characteristics of all major bipolar, unipolar, special microwave, and optoelectronic devices. This fully updated and expanded edition includes approximately 1,000 references to original research papers and review articles, more than 650 high-quality technical illustrations, and over two dozen tables of material parameters. Divided into five parts, the text first provides a summary of semiconductor properties, covering energy band, carrier concentration, and transport properties. The second part surveys the basic building blocks of semiconductor devices, including p-n junctions, metal-semiconductor contacts, and metal-insulator-semiconductor (MIS) capacitors. Part III examines bipolar transistors, MOSFETs (MOS field-effect transistors), and other field-effect transistors such as JFETs (junction field-effect-transistors) and MESFETs (metal-semiconductor field-effect transistors). Part IV focuses on negative-resistance and power devices. The book concludes with coverage of photonic devices and sensors, including light-emitting diodes (LEDs), solar cells, and various photodetectors and semiconductor sensors.
