Dave Liebman is one of the leading forces in contemporary jazz. Prominently known for performing with Miles Davis and Elvin Jones, he has exerted considerable influence as a saxophonist, bandleader, composer, author, and educator. In *What It Is: The Life of a Jazz Artist*, friend, pianist, and noted jazz scholar Lewis Porter conducts a series of in-depth interviews with Liebman, who discusses his professional, personal, and musical relationships with notable musicians, as well as such personal matters as contracting polio as a child. Featuring rare photos from Liebman's personal collection, this fascinating and witty story will not only appeal to jazz fans and scholars but also to those readers interested in the story of how a young man followed his dream to become one of the leading jazz artists of our time. This book is a story of a great adventure arising from a business where adventures could be least expected. Although it's hero, the late Tomas Bata, kept

his eyes focused sharply on the ground (in the shoe business- he has to) his mind was soaring high in dreams of a mission to make all mankind well shod. How he did it and what his motives and accomplishments were is presented in this biography of the man and his time with considerable detail and first hand knowledge. We see a man, who having run away from home at the age of fourteen to start his own business, was continuously impatient with both time and environment visualizing the opportunities which, although at hand, were never noticed by his competitors during his life. He was man who could visualize such opportunities even in the most difficult situations as indicated from his attitude toward the Great Depression of 1929: "Half of mankind is barefoot and only a fraction of the world's population is well shod," he said at the time of world-wide unemployment. "Look how little we've done so far and how much work is waiting for all shoemakers every-where in the world." And when the difficulties continued, he growled into their faces in 1930: "I would rather work for nothing than do nothing. Only when you work, can you keep hoping to find a way." Shoemaker, salesman and organizer of many industries, Tomas Bata was a man among men, changing the simple folk in and around his birthplace into modern industrial workers and managers of business and salesmen resembling a now almost extinct type of man who, in their pursuance of their business, have discovered in former centuries new territories and lifted up the standard of life and living everywhere. Necessity made him a politician to obtain the right to rebuild a whole city, a teacher pioneering new methods of education, a builder who combined building of factories and houses

with a businessman type of social service. However, he was first and always an entrepreneur extraordinary. As such, he attacked every problem with gusto of a prize fighter, and the zeal of a missionary, transferring an ideal into ideas--and these again into plans and actions. Ideal? What ideal and ideas? Some of them can be discerned from the pages of this book, others in the fierce loyalty and performance of the men whom he brought up to spread his message of entrepreneurship to the four corners of the world. In some ways, and perhaps indirectly, a reader could take this book as a challenge. If its hero succeeded in turning a simple business into a real adventure of service and a powerful way of life, why not you? Today's world needs men of Tomas Bata's caliber as much as his world needed them several decades ago, and perhaps nowadays even more. It is this type of man who provides the answers to the crucial questions of our time, i.e., whether our society, enjoying the good things of life, will survive as a home of free men. This, in the author's concept, is a final message arising from the biography of this extraordinary man, Tomas Bata: "He only earns his freedom and existence who daily conquers them anew." "Perhaps more than any other, this book gives the background necessary to understand the purpose and mindset of today's religious radicals. In this classic study of the roots of Islamic extremism, Gilles Kepel demonstrates the pivotal role of the Egyptian connection. He skillfully traces the story of Islamic anti-modernism in Egypt from the early part of the 20th century to its tragic involvement in some of the most violent incidents in recent years, including the terrifying attacks on the World Trade Center in 1993 and 2001. Kepel's treatment is even-handed and sensitive, though the world he uncovers is the dark side of today's global culture."—Mark

Brazil is blessed with a wide array of instruments which investors can use to manage and hedge interest rate and FX risks. The infrastructure supporting markets appears sound and is widely attributed by market participants to ensuring the resiliency of Brazil's markets despite a multitude of significant shocks. A key foundation of the resiliency of Brazil's markets is the large structural liquidity surplus (around 20 percent of GDP) and Brazil's substantial FX reserves. Market participants generally have ample cash reserves that provide a key buffer against liquidity shocks. Brazilian investors have a strong preference for high quality short term liquid investments. Brazil's history of economic instability drives investors towards short term liquid investments of the highest credit quality such as overnight repos and short-term government bonds. Dollarization is low reflecting restrictions on FX investments available within Brazil but hedges against FX risk are widely available and give investors' confidence to hold Real. Government bonds are the centerpiece of the securities markets. Intentionally excluded from formal politics in authoritarian states by reigning elites, do the common people have concrete ways of achieving community objectives? Contrary to conventional wisdom, this book demonstrates that they do. Focusing on the political life of the sha'b (or popular classes) in Cairo, Diane Singerman shows how men and women develop creative and effective strategies to accomplish shared goals, despite the dominant forces ranged against them. Starting at the household level in one densely populated neighborhood of Cairo, Singerman examines communal patterns of allocation, distribution, and decision-making. Combining the institutional focus of political science with the sensitivities of anthropology, she uncovers a system of informal networks, supported by an

informal economy, that constitutes another layer of collective institutions within Egypt and allows excluded groups to pursue their interests. *Avenues of Participation* traces this informal system from its grounding in the family to its influence on the larger polity. Discussing the role of these networks in meeting fundamental needs in the community-- such as earning a living, reproducing the family, saving and investing money, and coping with the bureaucracy-- Singerman demonstrates the surprising power these "excluded" people wield. While the government has reduced politics to the realm of distribution to protect itself from challenges, she argues that the popular classes in Cairo, as consumers of goods and services, have turned exploiting the government into a fine art. Research in real estate finance and economics has developed in an exciting way in the past twenty-five years or so. The resulting theoretical and empirical findings are shining a new light on some of the classic mysteries of the real estate markets. It is good to see that a growing proportion of this research output is concerned with contemporary problems and issues regarding the European and Far Eastern property markets. To stimulate a creative exchange of new ideas and a debate of the latest research findings regarding the global property markets, the Maastricht-Cambridge Real Estate Finance and Investment Symposium was established. This initiative aims at bringing together a number of leading researchers in the field for a short, intensive conference. The 2000 Symposium, which was hosted by Maastricht University in the Netherlands in June of that year, is the first in an annual series of such conferences, which will alternate between Maastricht

University and Cambridge University. This book is a compilation of the papers originally presented at the first Maastricht-Cambridge Symposium in 2000. comprehensive description, history, and analysis of Israel's economy. Plessner examines events of the past two decades and advances the hypothesis that problems within the Israeli economy can be explained by the extent of its departure from the institutions and rules that govern predominantly market economies. He argues that Israel is unusual in that it affords an opportunity to analyze a socialized economy embedded in a democratic society. Individual chapters describe Israel's economic growth and stagnation, the government's domination of capital and credit markets, and the absence of a truly independent private sector. The concluding chapter evaluates the stabilization program of the 1980s and its aftermath and provides a prognosis for the future. Told within the framework of the story of Zionism and the creation of the Jewish state, this book answers the question of why the Israeli economy finds itself today in the same state in which it has languished since 1973. The Second Edition of *Economic Theory and the Cities* has been revised and expanded with both the graduate student and the practicing professional in mind. Providing a state-of-the-art synthesis of important theoretical topics in urban economics, the volume emphasizes the fundamental links between urban economics and new developments in mainstream economic theory. From the Preface: In this book I present what I believe to be the most important theoretical topics in urban economics. Since urban economics is a rather diffuse field, any presentation is necessarily selective, reflecting personal tastes and opinions. Given that, I note on what basis I chose the material that is presented and developed. First, the basic spatial model of a monocentric city is presented, since it lays

the foundation for thinking about many of the topics in urban economics. The consideration of space and spatial proximity is one central feature of urban economics that distinguishes it from other branches of economics. The positive and negative externalities generated by activities locating in close spatial proximity are central to analysis of urban phenomena. However, in writing this book I have tried to maintain strong links between urban economics and recent developments in mainstream economic theory. This is reflected in the chapters that follow, which present models of aspects of the most important topics in urban economics--externalities, housing, transportation, local public finance, suburbanization, and community development. In these chapters, concepts from developments in economics over the last decade or so are woven into the traditional approaches to modeling these topics. Examples are the role of contracts in housing markets and community development; portfolio analysis in analyzing housing tenure choice and investment decisions; the time-inconsistency problem in formulating long-term economic relationships between communities, developers, and local governments; search in housing markets; and dynamic analysis in housing markets and traffic scheduling. The book ends with chapters on general equilibrium models of systems of cities, demonstrating how individual cities fit into an economy and interact with each other. This book is written both as a reference book for people in the profession and for use as a graduate text. In this edition, a strong effort has been made to present the material at a level and in a style suitable for graduate students. The edition has greatly expanded the sections on housing and local public finance so these sections

could be studied profitably by a broad range of graduate students. Recommended prerequisites are an undergraduate urban economics course and a year of graduate-level microeconomic theory. It is possible that the book can be used in very advanced undergraduate courses if the students are well versed in microeconomics and are quantitatively oriented. Focus on the basic spatial model of the monocentric city Expanded sections on housing and local public finance Discussion of the critical role of spatial proximity of different economic activities, such as housing, transportation, and community development This book explores the impact of finance on urban spaces as well as cities' role in the social constitution and dissemination of financial logistics and techniques. It brings together literature from different disciplinary areas to increase our understanding of financialization. It observes how non-financial members of society, such as public bureaucrats, urban planners, the media and so on, are actively involved in the financialization of urban areas. With an explicit focus on Brazil, a developing country in the Global South, the book demonstrates how the country has been grappling with complex and contradictory processes of neoliberalization, decentralization, re-democratization and institutional-legal strengthening of frameworks for urban and regional planning, stressing the relations between urban space and finance capital. With a distinct view of filling a gap in the current literature on urban financialization, the book aims to focus on less developed areas in this field and link them with the literature on social studies of finance. This makes the text relevant for academics and scholars of urban studies and planning theory,

geography, development studies and political economy, as well as scholars in the US and Europe interested in understanding Brazilian patterns of financialization. In the dying days of the Vietnam War, a royal family is rounded up and flown by helicopter to a remote prison camp. Behind the bamboo curtain erected by victorious communist guerillas, the tragic final days of an Asian king and his dynasty will play out. Bestselling author of *The Carpet Wars*, Christopher Kremmer takes readers on a gripping odyssey to Indochina's heart of darkness, the remote prison camp where the Kingdom of the Million Elephants and the White Parasol finally ends. Part travelogue, part mystery, *Bamboo Palace* reveals the only known eye-witness account of the final solution carried out in the jungles of northern Laos. 'Thrilling ... a marvellous gift for the well-turned phrase' - Michael Smithies, *The Nation* 'Now this is what I call a travel book' - Dianne Dempsey, *The Age* Annotation Examines the strategies of international real estate investing and provides a clear delineation of how they differ from real estate investing domestically. Throughout the ages physical money in the form of objects, coins and notes has increasingly been replaced by more abstract means of payment such as bills of exchange, cheques and credit cards. This book shows that in the years to come that trend to virtual money will continue apace. Urban space is a commons: simultaneously a sphere of human cooperation and negotiation and its product. Understanding urban space as a commons means that the much sought-after productivity of the city precedes rather than results from strategies of the state and capital. This approach challenges assumptions of urbanization as capital-

driven, an idea which resonates with a range of recent urban social movements, from the Arab Spring and the Occupy movement to the “Right to the City” alliance. However commons exist in a tense relationship with state and market, both of which continually seek to exploit and control them. Initiatives to create “commons” are welcomed and even facilitated by governments in order to (re-)valorize urban space and lessen the impacts of economic restructuring, while, at the same time, the creative and reproductive potential of the urban commons is undermined by continuing attempts to commodify them. This volume examines these topics theoretically and empirically through a wide spectrum of international case studies providing perspectives from a variety of cities as diverse as Berlin, Hyderabad and Seoul. A wider discussion of commons in current scientific and activist literature from housing, public space, to urban infrastructure, is explored through the lens of the urban condition.
